Sniff-sniff... this is definitely not my food.

No, kitty, it's not your food. It's an infusion pump — a device that slowly and accurately delivers medication during treatment.

Thanks to your donations, we purchased and delivered these devices and other essential equipment to shelters where sick and injured animals are treated. Initially, we planned to help five shelters, but thanks to your support, we were able to provide equipment to seven shelters. Here's the story 🙌
