З тих пір як завдяки вам отримали бронеплівку на вікна у притулок стало трошки спокійніше 🙏 дякуємо за вашу підтримку.

Text on the picture:

uanimals.official:

One day we will wake up to the singing of birds, not to explosions outside the window. How are you, dear ones?

shasspasu:

Ever since we received protective window film thanks to you, it has become a little calmer at the shelter 🙏 Thank you for your support.

We are incredibly grateful to receive such feedback from shelters, because it is the best proof that together we are doing something truly important. Caring for animals' safety begins long before danger appears. That is why this fundraising campaign is about preparing shelters in advance — so that in difficult moments they already have everything needed to protect the animals. Here is what we were able to accomplish thanks to you.

✓ For the **Adopt Don't Stop shelter** in Kyiv, home to 52 animals, we provided 10 packs of veterinary sedatives, 16.5 square meters of protective window film to reinforce the windows, as well as the materials and tools needed for installation.

In addition, the shelter received a closed-type fire safety stand with two powder fire extinguishers, five additional standalone fire extinguishers, location markers, and storage boxes for the equipment.

UAH 34,143.18 (≈ \$800) was spent on this.

✓ We also supported the **Gandhi shelter** in Kyiv, which cares for 104 cats and 11 dogs. We delivered 15 units of various veterinary sedatives, as well as eight vials of an anti-inflammatory medication for dogs and cats.

To reinforce the facility, we purchased 27 square meters of protective window film along with the materials and tools needed for installation, including technical alcohol for surface degreasing, scrapers, and metal squeegees. In addition, the shelter received two powder fire extinguishers and storage boxes for them.

UAH 28,481.22 (≈ \$700) was spent on this.

✓ We also supported the **Phoenix shelter** in Boryspil, Kyiv region, which cares for 89 cats and 29 dogs. We delivered nine packs of veterinary sedatives, 11.1 square meters of protective window film to reinforce the windows, as well as the materials and tools needed for installation – including technical alcohol for surface degreasing, scrapers, and metal squeegees.

In addition, the shelter received three powder fire extinguishers along with storage boxes for them.

UAH 16,527.11 (≈ \$400) was spent on this.

✓ At the **Homeless World shelter** in Bila Tserkva, Kyiv region, which cares for 450 dogs and 437 cats, we provided 34 units of veterinary sedatives and 13 units of pain-relieving and anti-inflammatory medications.

We also purchased 33.4 square meters of protective window film along with a full set of materials and tools for installation, including technical alcohol for surface cleaning, scrapers, and metal squeegees. In addition, the shelter received two closed-type fire safety stands with four powder fire extinguishers, 14 additional standalone fire extinguishers, location signs and markers, and storage boxes for firefighting equipment.

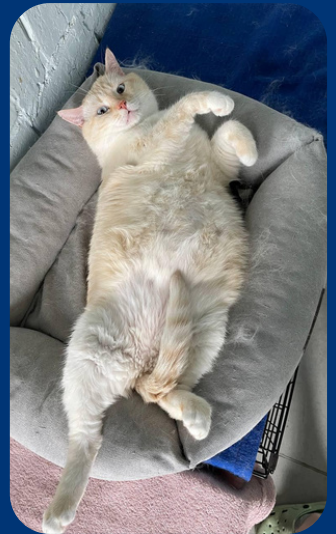

UAH 69,967.76 (≈ \$1,700) was spent on this.

Shelters are now living in the same conditions as all of us — alongside constant danger. Windows can be shattered by blast waves or debris, putting both animals and people at risk. Loud noises, shelling, or fires severely frighten the animals, causing intense stress that affects their health and behavior. And due to power outages, shelters are often forced to use generators and heaters, which always brings an additional risk of fire.

That is why, together with you, we provided sedatives for animals, window protection, and fire safety equipment — so that shelters could be a little calmer and safer every day.

And now, we invite you to take a look at the beautiful animals living in these shelters.
